PROFESSIONAL PROFILE

Fourth-year Bachelor of Science in Information Technology student at the University of Eldoret, with practical interests in web development, database systems, system analysis, networking and cybersecurity. Experienced in developing technology projects including a Healthcare Appointment System and a Bus E-Ticket Booking System. Completed industrial attachment at Rianyamwamu Tea Factory Ltd, gaining practical exposure to web design, database management and backup, Windows installation and updates, network crimping, and customer support.

EDUCATION

Bachelor of Science in Information Technology	**University of Eldoret** Expected December 2027
Kenya Certificate of Secondary Education (KCSE)	St. Thomas Moore Riang'ombe Secondary School 2022
Information Communication Technology (ICT) — Two-Year Programme	St. Thomas Moore Riang'ombe Secondary School Completed 2021

TECHNICAL SKILLS

- **Programming:** Python, C++, JavaScript, Java
- **Web:** HTML, CSS, JavaScript
- **Database:** MySQL, database management, administration and backup
- **Systems:** System analysis and design, software development, information systems
- **Networking:** Network crimping, networking fundamentals and system/network administration
- **Other:** Windows installation and updates, technical support, cybersecurity fundamentals

INDUSTRIAL ATTACHMENT

Rianyamwamu Tea Factory Ltd | 2 May 2026 – 31 July 2026

- Web design and website-related support.
- Database management and backup.
- Windows installation, updating and basic system maintenance.
- Network cable crimping and basic networking support.
- Handling and responding to customer complaints and technical support needs.

PROJECTS

Bus E-Ticket Booking System

A digital ticketing solution designed for a bus company to reduce queues at physical booking offices. The project focuses on online booking, mobile payment, electronic ticket/receipt delivery by email, and easier booking management for travellers and bus operators.

Healthcare Appointment System

A system concept focused on improving appointment scheduling and management between healthcare service providers and patients.

RELEVANT ACADEMIC AREAS

- System Analysis and Design
- Database Systems and Database Administration

- Application Programming
- Object-Oriented Programming
- Web Design
- Fundamentals of Networking
- Information Systems Security
- Data Structures and Algorithms
- Operating Systems
- Introduction to Artificial Intelligence

PROFESSIONAL INTERESTS

Web development • Database engineering • System analysis and design • Networking • Cybersecurity • Software development • Information systems
